Goldman Sachs

Short-Term Conservative Income Fund

Seeks to generate current income and secondarily maintain an emphasis on preservation of capital and liquidity.

Finding Opportunity
The Fund offers diversified, active management within the money market and fixed income sectors, and follows conservative investment guidelines.

Potential For Enhanced Return
With a longer duration than money market funds, this ultra-short duration bond fund seeks potentially higher returns while maintaining an emphasis on potential preservation of capital and liquidity.

Consistent Credit Risk Approach
Credit quality is not compromised in the search for yield. While the net asset value (NAV) of the Fund is expected to float, it seeks to minimize NAV fluctuation with a concentration on total return.

Average Annual Total Returns (%)
Below are the Fund’s average annual total returns with all distributions reinvested for periods ended 9.30.21:

<table>
<thead>
<tr>
<th>Period</th>
<th>1 Year</th>
<th>5 Years</th>
<th>Since Inception</th>
</tr>
</thead>
<tbody>
<tr>
<td>NAV</td>
<td>+0.25%</td>
<td>+1.69%</td>
<td>+1.31%</td>
</tr>
</tbody>
</table>

The returns represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: www.GSAMFUNDS.com to obtain the most recent month-end returns.

The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns. The Investment Adviser has agreed to (i) waive a portion of its management fee in order to achieve an effective net management fee rate of 0.20% as an annual percentage of the Fund’s average daily net assets, and (ii) reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, administration fees, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.004% of the Fund’s average daily net assets. The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are set forth above. Pursuant to a contractual arrangement, the Fund’s waivers and/or expense limitations will remain in place through at least July 29, 2022, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund’s Board of Trustees.

The Distribution Rate is the net annualized distribution rate for the month, based on the average daily income dividend during the period and the ending NAV per unit.

Lipper Total Return Rankings - Lipper Analytical Services, Inc., an independent publisher of mutual fund rankings, records rankings for these and other GS Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return. Rankings for other share classes may vary. All or a portion of the Fund’s distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information. Dividends are accrued daily and paid monthly. Distributions from net investment income, if any, are normally declared daily and paid monthly. Distributions from net capital gains, if any, are normally declared and paid annually.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion.

Portfolio Manager
26 Years of Investment Experience

The Goldman Sachs Short-Term Conservative Income Fund invests in a broad range of high quality, U.S. dollar-denominated fixed income instruments, including U.S. Government securities, obligations of U.S. banks, corporate notes, commercial paper and other short-term obligations of U.S. companies, certificates of deposit, states, municipalities and other entities, fixed and floating rate asset-backed securities and repurchase agreements. The Fund may also invest in U.S. dollar-denominated obligations issued or guaranteed by foreign banks, companies and governments or their agencies, instrumentalities or sponsored enterprises. The Fund is not a money market fund and does not attempt to maintain a stable net asset value. The Fund is subject to NAV risk, which means that the net asset value of the Fund and the value of investments in the Fund will fluctuate. The Fund’s investments in fixed income securities are subject to the risks associated with debt securities generally, including credit, liquidity and interest rate risk. Any guarantee on U.S. government securities applies only to the underlying securities of the Fund if held to maturity and not to the value of the Fund’s shares. Because the Fund may invest heavily in specific sectors (for example, the financial services sector), the Fund is subject to greater risk of loss as a result of adverse economic, business or other developments affecting such sectors. Foreign investments may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of adverse economic or political developments. Investments in asset-backed and receivables-backed securities are subject to prepayment risk (i.e., the risk that in a declining interest rate environment, issuers may pay principal more quickly than expected, causing the Fund to reinvest proceeds at lower prevailing interest rates). The Fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in bonds of similar projects or in particular types of municipal securities. At times, the Fund may be unable to sell certain of its illiquid investments without a substantial drop in price, if at all. The Fund’s investments and are subject to market risk, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. The Fund’s investments in other investment companies (including ETFs) subject it to additional expenses.

Morningstar Risk-Adjusted Ratings: Ultrashort Bond Category-Class I Shares 3 Year 3 stars out of 213 funds, 5 Year 3 stars out of 176 funds. The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund’s monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 4 stars, next 22.5% = 3 stars, next 35% = 2 stars, next 22.5% = 1 star, and bottom 10% = 0 stars. Overall rating is derived from a weighted average of the returns associated with its 3-, 5- and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 80% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 5-year rating for 120 or more months. The Net Asset Value (NAV) is the market value of one share of the Fund. Percentages may not sum to 100% due to rounding. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund’s entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

The Investment Company Act of 1940 (the “Act”) imposes certain limits on investment companies purchasing or acquiring any security issued by another registered investment company. For these purposes the definition of “investment company” includes funds that are unregistered because they are excepted from the definition of investment company by sections 3(c)(1) and 3(c)(7) of the Act. You should consult your legal counsel for more information.

This Fund and its respective benchmark have not been selected by an independent rating agency. The credit allocation provided refers to the Fund’s underlying portfolio securities. For the purpose of determining compliance with any credit rating requirement, each Fund assigns a security, at the time of purchase, the highest rating by a Nationally Recognized Statistical Rating Organization (NRSRO) if the security is rated by more than one NRSRO. For this purpose, each Fund relies only on the ratings of the following NRSROs: Standard & Poor’s, Moody’s and Fitch, Inc. This method may differ from the method independently used by benchmark providers. Goldman Sachs Asset Management will use a single rating if that is the only one available. Securities that are not rated by all three agencies are reflected as such in the breakdown. Unrated securities may be purchased by a Fund if they are determined by the Investment Adviser to be of a credit quality consistent with the Fund’s credit rating requirements. Unrated securities do not necessarily indicate low quality, and for such securities the investment adviser will evaluate the credit quality. Goldman Sachs Asset Management converts all ratings to the equivalent S&P major rating category when illustrating credit rating breakdowns. Ratings and fund/benchmark credit quality may change over time.

The method of calculation of the 30-Day Standardized Subsidized Yield is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price (“POP”) per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders.

This material is not authorized for distribution unless preceded or accompanied by a current prospectus or summary prospectus, if applicable. Investors should consider a fund’s objectives, risks, and charges and expenses, and read the summary prospectus, if available, and the prospectus carefully before investing or sending money. The summary prospectus, if available, and the Prospectus contains this and other information about the Fund. Goldman Sachs & Co. LLC is the distributor of the Goldman Sachs Funds.
