Goldman Sachs
Emerging Markets Equity Fund
Seeks Long-Term Capital Appreciation

Companies, Not Countries
The team builds the portfolio one company at a time by looking for stocks in local markets that are trading at a discount, but have the potential to generate strong returns. This allows them to focus on the merits of each investment rather than country or sector allocation, seeking to deliver strong outperformance through stock selection.

Exposure to Opportunities Beyond the Index
Emerging markets benchmarks can be restricting, as they may have a bias towards larger-cap, government-owned stocks. We believe a broader opportunity set, outside the index, with exposure to small/mid caps, may offer greater potential for appreciation due to market inefficiencies.

Local Expertise
Our experienced team of ~30 investment professionals leverages Goldman Sachs Asset Management’s offices worldwide to construct a portfolio of emerging market stocks that seeks to outperform in various market environments. The team seeks to gain insight into local companies that may be overlooked by managers operating solely within their home countries.

The returns represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: www.GSAMFUNDS.com to obtain the most recent month-end returns.

The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because institutional shares do not involve a sales charge, such a charge is not applied to their standardized total returns. The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund’s waivers and/or expense limitations will remain in place through at least February 28, 2021, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund’s Board of Trustees. Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions.

Morningstar Risk-Adjusted Ratings: Diversified Emerging Mkts Category- Class I Shares 3 Year 4 stars out of 707 funds, 5 Year 5 stars out of 580 funds, 10 Year 4 stars out of 237 funds. The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund’s monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the ratings associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. The Net Asset Value (NAV) is the market value of one share of the Fund. Percentages may not sum to 100% due to rounding.

About GSAM
Goldman Sachs Asset Management, L.P., the asset management arm of The Goldman Sachs Group, Inc., is among the world’s largest asset managers, with $1.69 trillion in assets under supervision as of 12.31.19. Founded in 1869, Goldman Sachs is a leading global investment banking, securities and investment management firm.

The Goldman Sachs Emerging Markets Equity Fund invests primarily in a diversified portfolio of equity investments in emerging country issuers. The Fund’s investments are subject to market risk, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. Foreign and emerging markets investments may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. Because the Fund may invest heavily in specific sectors, the Fund is subject to greater risk of loss as a result of adverse economic, business or other developments affecting such sectors. The Fund may make investments that are or may become illiquid. At times, the Fund may be unable to sell illiquid investments without a substantial drop in price, if at all.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. As of June 30, 2018 the MSCI Emerging Markets Index consisted of the following 24 emerging market country indices: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and the United Arab Emirates. This Index offers an exhaustive representation of the Emerging markets by targeting all companies with a market capitalization within the top 85% of their investable equity universe, subject to a global minimum size requirement. It is based on the Global Investable Market Indices methodology. This series approximates the minimum possible dividend reinvestment. The dividend is reinvested after deduction of withholding tax, applying the rate to non-resident individuals who do not benefit from double taxation treaties. MSCI Barra uses withholding tax rates applicable to Luxembourg holding companies, as Luxembourg applies the highest rates.

The Weighted Average Market Cap represents the average value of the companies in the index or portfolio. The Weighted Median Market Cap provides the middle market capitalization level in the index or portfolio. Companies with a larger market capitalization have a greater impact on both calculations. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund’s entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

Lipper Total Return Rankings - Lipper Analytical Services, Inc., an independent publisher of mutual fund rankings, records rankings for these and other GS Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return. Rankings for other share classes may vary. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor’s, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Correlation Measure - R-squared: Measures how closely the historical movement of a portfolio’s returns relates to a particular market index over a specified time period. Risk Measures - Standard Deviation: Measures the historical total risk of a portfolio by assessing the probable range within which a portfolio’s return could deviate from its average return over a defined historical period of time. Beta: Measures the historical market risk of a portfolio or the volatility of a portfolio relative to an underlying index over a defined historical period of time.
